

Mini-Geared Motor 81 200

- Miniature geared motor in high-quality metal
- For the direct connection to the function outputs of a decoder
- Size 15.5 x 11 x 8 mm
- Drive shaft 11.5 mm long, Ø 1.5 mm
- Includes a pulley, cam lever and two fixing bolts

With the mini-geared motor, vehicles and working models, e.g. crane cars, gantry cranes, pantographs or gate mechanisms, can be motorized.

The motor develops torque of 0.12 Ncm and can lift a weight of approx. 60g with the pulley. Idle speed is 30 revolutions/minute.

Connecting to the function outputs of a decoder

When connected to the function outputs of a locomotive or a function decoder the mini-geared motor 81 200 can be switched on and off using the function keys.

Our contact Details: Service

In the event of a defect or failure send the unit together with the invoice and a short description of the fault back to us for repair.
